Mental case work is on the rise.The people and businesses are thriving by taking advantage of the Human Mind.When it comes to handling cases, it's not all about the law.Any litigator will tell you that the most common pitfalls of legal work are the most obvious:managing legal documents and preparing documents. Here, we will share a bunch of office tricks and shortcuts that will make you an effective attorney. These are highly effective and time saving tips for all litigators and document management. Moreover, the process has been tested on a real-life practice. All of our tips were made from our personal experience working with, and for, lawyers. Let's dive in! 1.Delegate:This is probably the most popular tool to ease your work. Hire freelancers or make a friend to work with you. Everyone has a different skill set, which makes it easy to find someone who can work on any task you need. You'll never have to go through the tedious process of finding the right person. 2.Organize your documents: This tip may seem a little obvious, but making sense of all the pieces of paper and documents you need to manage can be a big task, specially if you have a litigator office. That's why we've devised a few workflows that will organize your documents in the most efficient way. 3.Efficient searching: Let's be honest: if you spend a lot of time shuffling files and trying to find a specific paper, you'll be wasting your time. Searching is one of the most important functions you can master, so we created this workflow. 4.File Tagging: A little known feature on Windows is the ability to quickly label or tag files in your folders. Tagging your files lets you keep track of them, in a simple way, it's an invaluable tip that will save you a lot of time and effort. 5.Catch errors: In legal work, it's common for everyone to try to find errors in your work. This way you'll quickly get an idea of how your work is being read, and how it can be better. 6.Document management: This is a little more advanced, but we're definitely going to tell you about it. 7.Manage your time:

Manage and sort your "clippings" in your favorite way: • Create, rename and delete "Clippings" catalogs • Display the contents of the Clippings catalogs in different windows • Manage all the actions that will be done on the items in the Clippings catalogs. You can now handle, display and store a clipboard on a spreadsheet, a webpage, a word processor document, a drawing, a vector drawing, a picture or any other file format you wish. You can choose between listing the items, a hierarchical list or a sorted list, and keep track of the date of the creation or the last modification of the clippings. You can also sort the items by any criterion, be it the order of creation, last modification or access date. The clippings are added directly to your favorite clipboard or displayed in a separate window. You can also choose to display the items in the Clippings catalogs in tabs or windows, and the way you choose to display the items will be related to the app and browser that are used to display the clippings. You can automatically display the contents of the clippings catalogs from the clipboards that you have set up, by selecting a "Watch Folder" shortcut on your computer or from your favorite web browser. With this Clippings Management program, you can: - Automatically create a "Clippings" catalog for each file format you wish to store clippings - Create, rename and delete "Clippings" catalogs - Display the contents of the Clippings catalogs in different windows - Manage all the actions that will be done on the items in the Clippings catalogs. You can now handle, display and store a clipboard on a spreadsheet, a webpage, a word processor document, a drawing, a vector drawing, a picture or any other file format you wish. You can choose between listing the items, a hierarchical list or a sorted list, and keep track of the date of the creation or the last modification of the clippings. You can also sort the items by any criterion, be it the order of creation, last modification or access date. You can automatically display the contents of the clippings catalogs from the clipboards that you have set up, by selecting a "Watch Folder" shortcut on your computer or from your favorite web browser. - Display a horizontal or a vertical list of "Clippings" - Display each clippings in a different tab or a different window - Create, rename and delete "Clippings" catalogs - Manage all the actions that will be done on the items in the Clippings catalogs. This program allows you to: - View your clippings as you wish: list or view as a tab or as a window - Sort the
