Created by Droid Cafe Designed for Windows 7, 8, 10 and other Operating Systems. The free of charge Windows 8 theme collection is enhanced with the latest visual tweaks and a whole lots of special effects! ]]> 8 Metro Themes - 13 New Themes and Wallpapers 13 Oct 2013 00:00:11 +0000>Windows 8 is out now and the new operating system is available to download for free on the web and for free from the Microsoft Store. After almost a year, Microsoft has released the new operating system. Windows 8 is considered to be the best operating system for tablets and mobile devices, as it provides high-level of function but still very easy to use. Windows 8 UI is very different from previous operating systems and many users are not accustomed to it. However, there are already a lot of beautiful themes and wallpapers provided by developers, in this post, I am going to feature thirteen of them. These themes are unique and do not cover the classical desktop themes, these are specifically for the Windows 8 UI. If you are one of the many users who do not use the Windows 8 UI, the free Windows 8 Classic theme is still available. If you are one of the users who likes the classic desktop mode but do not like the monochromatic look, you can use the latest theme collection known as the Office Metro Themes, and a series of Office Office-themed themes including Office 2013 (themes and wallpapers for Microsoft's new Office release for Windows 8). ]]> 8 Metro Themes - Free and

Q: Combine arbitrary fields with different data types to one container  
I want to combine records from different files. The filenames I need for processing are always the same, but the content (that is the whole line of the file) might differ. I also want to add the timestamp (so I can have a "dateline" on which the files are joined). For that, I want to use a flat[][] to store the data, e.g., something like: `val lines = Array( Array("foo", 1, "bar"), Array("foo", 2, "bar"), Array("foo", 3, "bar"), Array("foo", 4, "bar"), Array("foo", 5, "bar") )` With the line: `lines.concat( Array("foo", 1, "bar", "SOMECLASS.bar") )`
