Now, I am trying to compile the source code with NetBeans. It seems to successfully compile. But when it compiles, it shows me the following error: Failed to create task list directory:

The book came out two weeks before the Helsinki summit at which President Donald Trump and Putin rekindled their relationship. Since the summit, the revelations in the book about Trump's alleged links with Russia have become public. The book says Putin was undeterred by US sanctions imposed in the wake of Russia's 2014 annexation of Crimea. The sanctions were an immediate blow to the Kremlin's key economic asset, energy exports. 'For Putin, a bankrupt Russia is a better Russia,' said Mary Dejevsky, with the pro-Putin magazine Great Britain. The book is written by the former head of Russia's foreign intelligence service (FSB) Sergei Naryshkin and veteran journalist Yury Felgenhauer. Its publication coincides with the start of hearings in Congress about suspected collusion between Trump's inner circle, Russia and Wikileaks. 'Putin can't enjoy domestic life any more, and so he is surviving only through his system of espionage... which is total and completely independent from the US,' tweeted Felgenhauer
