ImageBank Server [April-2022]

This is an Image hosting server that can be used as a file sharing Web server or an FTP server to store and share images and movies. While using this program we can create any folders we want within the program's folder, and anything within it will be automatically shared. What's New In This Release: Changes: Added: Added the ability to setup a port for the server. Added: The ability to allow image comments. Added: The ability to add images to a "favorites" list. Added: The ability to remove a favorites list. Added: The ability to search for images from the favorites list. Added: The ability to share the password for an image. Added: The ability to select a default server port. Added: The ability to delete the current server configuration settings. Added: The ability to create new users and groups. Added: The ability to create users and groups and allow them to log in. Changed: Updated the look and feel of the program. Changed: Updated the installation information. Changed: Updated the default web links and other links. Changed: Updated the help file. Changed: Removed the ability to edit the source code. Changed: Added support for setting public folders with customizable names. Changed: The log file is now stored in its own folder. Changed: Added support for compressed RAR and ZIP archives. Changed: The optional "do not show" check box now displays a dotted box around the button instead of a line. Changed: The primary user name field now only shows the first name when no other information is set for the user. Changed: The Help file has been updated to reflect changes in the program. Changed: The server no longer displays a proxy server based on the Windows system environment. Changed: The server will now use a "direct" connection instead of the "through a proxy" option as default. Changed: The image list now opens a "New" window instead of a dialog box when in the settings screen. Changed: The ImageBank Server Serial Key now saves log files in its installation directory rather than in the Windows system log. Changed: The "do not show" box now opens a dialog box when checked instead of the line. Changed: The help file has been updated to reflect changes in the program. Changed: "Sharing" is now at the top of the list of server
