N1MM Logger+ Crack Patch With Serial Key Free PC/Windows 2022 [New]

[Download](#)

N1MM Logger+ Crack + Download [Win/Mac]

N1MM Logger+ Download With Full Crack is a versatile frontend for N1MM 2007. It is designed to work as an event log, as a technical monitoring tool and a multiuser station database. It allows you to collect data, modify entries and display it graphically and in various other ways. By default, it records all electronic messages received or transmitted, including over-the-air contests. Other types of messages can be displayed, such as amateur radio special event messages, AMS stations, ISP stations, repeaters, remote repeater monitoring, and others. Logger+ works with generic 64-bit TAPs and with logic units based on the N1MM 2007 API. It supports the DTMF keypad as an interface for logging special event messages, with additional features such as tone duration and sound levels.It has a command line interface to which you can subscribe by logging on to a remote computer. This is especially useful for users working on a standalone computer which does not run a graphic environment. You can connect to it via TCP/IP, or by using a simple VBScript that starts up on log on.If N1MM Logger+ Cracked 2022 Latest Version appears too small for your needs or you have a particular application you need to keep track of, you can integrate it directly into the GUI of N1MM 2007. For customers that run the latest Major Release of N1MM 2007, Logger+ is fully integrated into the main menu. For those who have yet to upgrade, you can download the Customization Module that comes with a N1MM 2007 30-day Support Agreement. N1MM Logger+ and the Customization Module are both available as (eval) .MSI files that you can run on your PC. The N1MM Logger+ and N1MM Logger+ with GUI , N1MM Logger+ Command Line, N1MM Logger+ Module and N1MM Logger+ GUI are available for evaluation at n1logger+.com or by purchasing the evaluation .MSI file, n1logger+.com Overview N1MM Logger+ is a versatile frontend for N1MM 2007. It is designed to work

N1MM Logger+ Keygen Full Version Download [Mac/Win]

N1MM Logger+ Torrent Download is a logging application for amateur radio station communication. It is designed to capture data, aggregate it, and display it in an easy to use manner. The most commonly used data is the signal strength, time, frequency, and other information available on a radio station. N1MM Logger+ Serial

Key supports logs based on BCELink files. These files contain timestamps and log data in a special format. N1MM Logger+ writes BCELink files directly and can import and export BCELink files in a variety of formats, including ANSI, BCELink, CSV, and XML. N1MM Logger+ has a couple of features that simplify the operation of BCELink files. First, N1MM Logger+ can automatically identify the data in the log files and extract it to easily searchable database records. Second, N1MM Logger+ supports SQL queries on the data and can display queries in dynamic charts. http aa67ecbc25

N1MM Logger+ [2022-Latest]

N1MM Logger+ is a freeware, modular and very powerful amateur radio contest logging software designed with the amateur radio enthusiast in mind. It has been an absolute pleasure to create this application and I sincerely hope that it will be useful for you guys. If you are an active ham radio operator and take part in contests or any other type of radio transmissions and you want to log the activity into a database, then you should definitely check out N1MM Logger+. I have tried to make the application extremely versatile and user-friendly in which you will have a great time connecting all sorts of antennas and equipment and recording the logs. The application comes with a collection of handy utilities, such as the ability to display your contacts, station addresses, class of license and frequential bands in a very attractive and easy to read format. The application interface is extremely simple and straightforward, you will need only a basic knowledge on how to operate the mouse and type some text. Just enter or check everything you want to log right from the main window of the application. You can add your own fields, make edits, copy and paste data from N1MM Logger+ as well as create preset radio logs, copy log files, save logs into a single or multiple compressed files and even repair broken files in case something went wrong or simply to compress them into a ZIP archive. The whole logging process is very simple and straightforward, you can even share your contest logs, export them and export the entire application itself. Features: * Gain access to a wide variety of incoming and outgoing amateur radio contest contacts and logs * Display station addresses, classes of license, bands, alerts, station status, contact information, zone, station type, mode, and band plan * Export log files to a single or multiple ZIP archives or even email it * Repair corrupted log files * Log messages that include: Call sign, time, frequency, band, mode, and antenna; Into, of, out, frequency offset, mode, and antenna * Log number of days, contacts, time, frequency, band, mode, contact info, etc * Display number of ignored calls, number of contacts, off time, suspect calls * Send log files to N1MM Logger+ via direct download or email to a different address * Do a log backup of a logged database * Do a log differential of logged database from start of the current month to the specified date * Save contact address, call sign, time, frequency,

What's New In?

N1MM Logger is a software utility that logs radios contest results. You can log your own practice contest results or automatically log contest results. It reads all "CW" (Continuous Wave) and "SSB" (Single Side Band) Amateur Radio contest results and automatically logs the frequency, date, time, lat/lon and elevation. It automatically logs practice, short test and official contests. You can copy contest results into another database such as Excel and sort them. The software searches the net for "Ham Radio" contest results and automatically logs all the contest results. It reads voice and text contest results and automatically logs the contests. It will also automatically log results and send an SMS message. This program is so easy to use it will allow even beginner and intermediate radio enthusiasts to log their own or contest results. N1MM Logger also automatically logs GPS coordinates and file names. Download the free trial version now!
