In the game, the player takes on the role of a master of computer software. There are three branches of development to be discussed. Each of them is devoted to a different type of programming: software, programming or hacking. The player is a programmer that doesn't like to give up to the world of the computer, he is a cyberpunk. He has a desire to fight for the right to free software development. The main source of income for the player is an in-game encyclopedia in the style of World Of Warcraft - it opens a huge world for the player, enabling the exploration of the Internet and gaining access to the most important resources of the digital world. The player is searching for and discovering all sorts of files and codes of the software. In the game there is no need to use the mouse. When one of the cubes overheats, the heat will take more time to cool down. Upgrades make the cooling more effective. When the "heat" bar gets to its bottom, you need to wait for 10 seconds for overheating. Upgrades: As the game progress, the player will be able to buy upgrades to his computer with money earned during the game. The upgrades will increase the efficiency of the cooling, enabling us to get a higher level of the game. If you use an upgrade, you will get a hint that tells which skill you need to unlock in the next level. If you want to unlock more upgrades, you will have to earn more money from the encyclopedia. To unlock the next level, you will have to complete certain conditions: - Collecting data from different sources - Winning battles in different conditions - Earn money and levels Platforms ClickBit for Windows PC: - Windows 7, 8, 10, XP - Windows Vista - Windows 2000 - Windows 9x and ME - Mac OS X 10.7 and up - Android 2.1 and up ANDROID When the game starts, choose the platform you wish to use.
