KeyMacro allows you to quickly cut and copy text or special characters and automatically paste them to any application. To use this tool, you need to install the program and enable it in the

application settings. Once this is done, the program will search your clipboard history for any special characters or text, then it will suggest the option to copy to or paste the content of your clipboard to any application. For instance, if you are composing an email and want to send a smiley face or other icons to the correspondent, just right-click on any text or special character and click on "Paste to Email". Even though the program suggests some specific content to paste, you can choose your preferred ones and paste them where you want. If needed, you can choose the specific command or keyboard shortcut to paste the content of your clipboard to any application. After the program has finished its job, it will provide you with a "KeyMacro History" section to see all your pasted content. PLUSCONCEPT Description: PlusConcept makes editing any item in the Windows Explorer easily. It provides users with a large set of convenient features, such as category-based tree structure, a drag-and-drop editing mode, as well as a variety of control buttons. PlusConcept enables you to drag items from Windows Explorer to the tool bar, the command bar, the tabs, the window frame, or simply drag them anywhere in the workspace. This application will prompt you for the current path of the selected item upon deployment. The tree view in the workspace shows the file name as the root of the selected item. A button bar in the workspace will allow you to edit any items, such as resize, rename, or move. PlusConcept provides you with various default tools for each type of item. You can open any file using the "Open File" tool, view file properties using the "File Properties" tool, view the contents of a directory using the "Directory Contents" tool, move files using the "Move Files" tool, create shortcuts using the "Create Shortcut" tool, and much more. On the left side of the window, you can switch between the folder view or the icon view. In the latter, the toolbar will display a variety of additional tools, such as sorting, searching, moving, creating, or deleting items. Besides the basic editing features, PlusConcept has a handy context menu with a variety of additional functions, such as creating, copying 2edc1e01e8
