Manjula Software Systems Leland L Beck 3rd Edition PDF.How to create a Google Sheets list from separate Google Sheets document How to create a Google Sheets list from separate Google Sheets document Share on social media A very popular thing nowadays is to have web pages as a list. There are lots of tutorial online that explains how to make a Google Sheets list from a template document. In this tutorial I will show you how to make a Google Sheets list from a document that is stored in your Google Drive. So let's begin. To start with, we need to connect our Google Sheets workbook to our Google Drive. You can use Google Sheets API Explorer. Go to the Google Sheets API Explorer. Type in the ID of your Google Drive workbook. Click Add to get the URL of the workbook. Step 2 We can then enter the URL of our workbook as a value of sheet.url. Step 3 From the drop-down menu of Value, select SheetsTable. We need to specify a field name first. We will choose id, so it should be: First part - we need to specify the type of formatting in cell. In this case, we will use text formatting. Second part - we want to create our list. We can create the list by using the text formatting "List": Step 4 Click Convert to get the URL of the new list. We will then paste it in the field sheet.list.
